CAREER GUIDANCE FOR SCHOOLS

Help every Grade 9 learner choose subjects with confidence.

Iroli Career Pathway matches South African learners in Grades 9–12 to careers and Grade 10 subjects that fit who they are — and shows your teachers where guidance is needed most.

What your learners get

- **A personality assessment** that matches their interests and strengths against 77 real careers across 15 fields.
- **A Grade 9 Subject Choice Assessment** that weighs what they enjoy, how they work and their latest marks.
- **Real entry requirements** — degree programmes, APS scores and a built-in APS calculator.
- **A four-page personal report**, downloadable as a PDF, to talk through with a parent or teacher.

What your school gets

- **Class join codes** with seat tracking for each class.
- **A Grade 9 cohort dashboard** showing pathway trends and who needs guidance.
- **CSV export** of cohort data for your own records.
- **Admin roles** scoped to a teacher's own class or the whole school.

How it works

1. **Get in touch**
   Email us. We set up your school and give you a class code for each class.
2. **Learners join**
   They sign up, enter the class code and take two short assessments (about 35 questions each) on any phone or computer.
3. **Act on the results**
   Learners download their reports; teachers see the whole cohort on one dashboard.

SCHOOL

R150 / learner / year

One school, as many classes as you need.

INSTITUTION

R100 / learner / year

Several schools or a district, with a dedicated account manager.

START NOW

A **trial licence** is available while invoicing is arranged, so your learners don't have to wait.

Honest, never final. Every result is framed as "worth exploring" — a starting point for a conversation with a teacher or parent, never a verdict on a learner's future.

Bring Iroli to your school

Email us to set up your classes or ask for a trial licence.
